MEMORANDUM

DATE: January 8, 1996 5400.1

TO: E. C. Mast, Environmental Restoration, Waste Management, Bldg, T080, X8589

FROM: *M.B. Murdock*
M. B. Murdock, Ecology, Bldg. T130B, X3560

SUBJECT: THREATENED AND ENDANGERED SPECIES AND MIGRATORY BIRD
CLEARANCE FOR WASTE MANAGEMENT SITING STUDY AREA DRILLING
EAST OF SOLAR PONDS - MBM - 005 - 96

At your request Ecology personnel inspected the work area for the Waste Management Siting Study drilling activities to be performed east of solar ponds. No threatened and endangered species and migratory bird concerns were identified within the planned work area. Should work not be completed by March 1996, migratory bird surveys may require renewal. Should the current project be greatly revised, or should a new phase of the project start, new or additional surveys will be required. Project personnel should be aware that wetlands do exist on the hillside directly north of the Solar Ponds. Any work in that area must avoid damage to those wetlands. Ecology personnel are available to provide guidance on avoiding wetlands impacts.

Should you have comments or require further information, please call me at extension 3560.
